

**Quarterly Performance Report**  
**As of December 31, 2018**

**It is the policy of the Department of Financial Services (DFS) to make available a broad range of investment options that have varying degrees of risk and return. The DFS has responsibility for ensuring that a variety of investment options are available, that information regarding these options is available to participants, and that program investment management expenses are kept to a minimum. The State of Florida's 457(b) Government Deferred Compensation Plan is a participant directed investment program. The DFS has an established Investment Policy for Product Selection and Retention (IPPSR) that establishes the investment standards for the Government Employees' Deferred Compensation Plan, adopts criteria for the selection and retention of the Plan's investment options, and provides a method for the quarterly evaluation and monitoring of the investment options. Copies of the IPPSR and product evaluations are available upon request.**

**For more information, you may contact our office at 850-413-3162 or toll-free at 1-877-299-8002. You may also visit our website at [www.myfloridadeferredcomp.com](http://www.myfloridadeferredcomp.com).**

*The numbers discussed in this document are performance as of the date indicated. Past performance does not guarantee future results. To find more detailed information on products listed in this report contact the Investment Company directly. A prospectus can be obtained from the Investment Company and should be read carefully before investing.*

**Company Communications.** The Investment Providers in the program offer a variety of methods to assist in retirement planning goals. Companies offering face-to-face representatives, phone, and internet services are Empower Retirement, Nationwide Retirement Solutions, VALIC, and Voya. T. Rowe Price representatives are available via telephone and internet. To enroll the following options are available:

1. Click the  button on the Bureau of Deferred Compensation website at (www.myfloridaderferredcomp.com) and complete and submit the EZ Enrollment Form electronically;
2. Fax your EZ Enrollment form to 850-488-7186, or scan/email to [deferredcompensation@fldfs.com](mailto:deferredcompensation@fldfs.com) (documents scanned or e-mailed should be encrypted to protect personal information);
3. Enroll online with Nationwide, Empower Retirement, VALIC, Voya, or T. Rowe Price.
4. Contact one or more of the 5 Investment Providers by phone to request an enrollment package to complete and return.

**Investment Options Available.** The Investment Providers offer a wide variety of mutual funds and guarantee of principal and interest accounts (see pg. 10 & 11 for definitions).

**Qualified Default Investment Alternatives (QDIA).** Each Investment Provider offers a menu of Target Date Funds (TDF) used as a default investment based on the participant's age and time to retirement. These TDFs qualify under the U.S. Department of Labor regulations as QDIA by acting as a single investment capable of meeting a participant's long-term retirement savings needs.

**Fees.** The "Investment Management Fee" is a fee charged by the mutual fund company itself and not the Investment Provider. This fee is included in the investment return. The investment management fee is important and should be considered when choosing a Company.

**Customer Service.** Customer service is a priority of the Bureau of Deferred Compensation and each Investment Provider within the program. Please contact the Bureau of Deferred Compensation toll free at 1-877-299-8002 with any concerns.

**Investment Advice.** All of the Providers offer free consultation upon enrollment in the Deferred Compensation Plan. Additionally, Nationwide, VALIC, and Empower Retirement offer advisory services to provide Participants in selecting investments and other decision regarding allocations and investment decisions. These services are available to participants for a fee. Please contact Nationwide, VALIC, or Empower Retirement for any further questions about these advisory services.

## Column Explanations

(Needed for pages 3-9)

**Investment Providers** are the financial service providers that offer investments through the Deferred Compensation Plan. The Plan features five traditional investment companies and one online brokerage service company. Toll-free telephone numbers and web addresses are provided for easy access.

**Products** are the individual mutual funds, Target Date Funds, deposit accounts, and other investments offered by the Investment Company.

**Morningstar Fund Category** identifies what type of stocks or bonds are held within that particular mutual fund. The definitions for all of these categories can be found on page 11 of this document.

**Benchmark Index** is a comparable standard for that particular mutual fund category and is listed below each mutual fund *in italics*.

**Ticker Symbol** is a system of letters used to identify the mutual fund in various types of media such as newspapers, websites, etc.

**Star Rating** is the 5-year Morningstar Star rating of a fund's risk-adjusted return as related to similar funds. Funds are rated from one to five stars, with the top 10% of performers in each Morningstar Category receiving 5 stars and the bottom 10% of performers receiving 1 star. The Morningstar Star Rating is used for identifying funds worthy of further research, but should not be considered buy or sell recommendations. Funds with a Star Rating less than 3 are being reviewed for possible termination from the Deferred Compensation program.

**Inception Date** is the day a fund begins offering shares is known and identifies the beginning of a new mutual fund.

**Historical Returns** are the 12 month, 3, 5, and 10 year returns detailing the gain or loss from an investment over that time period. The historical return should be equal to or greater than the Benchmark Index returns over the same period of time. **However, returns reflect historical performance and should not be considered indicative of future performance.**

**Fees** include the portfolio manager's compensation and other expenses associated with operating the mutual fund. The fee is stated as a percentage of the fund's average daily net asset value and is assessed before any returns are paid to investors. The expense as a dollar amount of the fee *will vary* due to factors such as account balance and rate of return. For example, the dollar amount of the fee for a \$1,000 account with an Investment Management Fee of 0.60% would be \$6.00 (without any type of fluctuation in the fee or trading activity). A portion of the Investment Management Fee may be reimbursed to our Investment Companies for offering a particular fund. A portion of these fees -- \$1.70 per participant per month -- funds the State of Florida Deferred Compensation Program.

[www.myfloridadeferredcomp.com](http://www.myfloridadeferredcomp.com)

- \* Fund names with respective 'ticker symbol' are the variable investment products offered in the Deferred Compensation Plan.
- \* Immediately below the fund name in **bold** is its **Morningstar Category**.
- \* After the Morningstar Category, and in *italics* is the *benchmark index* identified by the Fund to measure its performance.
- \* Comparing the Fund against its *benchmark index* will give an indication of fund performance.
- \* The Star Rating is determined by comparing a fund's risk adjusted returns with all other funds in the same category. A rating is then assigned (5 = best, 1 = worst).
- \* Short-term and excessive trading fees may apply. Please see the prospectus of the mutual fund for more information.

*\* Fixed account returns are guaranteed for the current quarter and credited & compounded daily.*

*\*\* First Quarter return has been declared by the respective Investment Provider*

*The assets in the guarantee of principal and interest accounts are backed by the financial strength of the insurance companies offering them. Additionally, the Office of Insurance Regulation analyzes the financial condition of the insurance companies on a quarterly basis.*

## **Explanation of Morningstar Fund Categories**

Mutual funds do not guarantee a rate of return, nor do they guarantee against loss of money invested. There are two things that will cause the value of a variable fund to increase: 1) the fund is paid interest and/or dividends, which is considered income, or 2) the fund sells a stock or bond at a higher price than it was purchased for, which is considered capital appreciation. Mutual funds differ based on their investment objectives. Some funds seek as much income as possible, while others attempt to increase their value solely through capital appreciation. Many funds attempt to increase in value through both income and capital appreciation. Funds that look to increase in value through income have relatively stable returns (low volatility), while funds that seek capital appreciation have relatively unstable returns (high volatility). Listed below are definitions of various fund objectives.

### **Mutual fund**

An investment company that pools money from shareholders and invests in a variety of securities, such as stocks, bonds and money market instruments. These funds offer investors the advantages of diversification and professional management.

### **Large, Mid, or Small Cap Stock Fund**

Refers to the size of the companies in which the fund is investing. Large capitalization stocks are those companies that have a market capitalization greater than \$5 billion. Mid-cap stocks have a market capitalization between \$1 billion to \$5 billion. Small cap stocks have a market capitalization ranging from \$250 million to \$1 billion. The mutual fund can also have a Value, Growth, or Blend aspect as noted below.

### **Value fund**

A mutual fund that invests in companies which it determines to be undervalued. Assuming that a company's share price will not remain undervalued indefinitely, the funds look to make money by buying before the expected upturn. Value funds tend to focus on safety rather than growth, and often choose investments providing dividends as well as price appreciation.

### **Growth fund**

A mutual fund whose aim is to achieve price appreciation by investing in stocks of established companies. Typically any dividends or income paid to the fund is minimal, as growth companies will retain all or most of their earnings for research and development and reinvest profits.

### **Blend fund**

A mutual fund whose assets are composed of a combination of stocks, bonds, and money market securities, rather than just one or two of these asset classes (also sometimes called hybrid funds or balanced funds.)

### **Bond fund**

A mutual fund that invests in bonds, typically with the objective of providing stable income through regular interest payments.

### **Intermediate Bond fund**

A mutual fund that invests primarily in corporate and other investment-grade U.S. fixed-income issues.

### **Multisector Bond fund**

A mutual fund that invests its assets among several fixed-income sectors, including U.S. government issues, foreign bonds, and high-yield bonds.

### **Conservative Allocation fund**

A mutual fund that seeks income and capital appreciation is the secondary objective, by investing in stocks, bonds, and cash.

### **Moderate Allocation fund**

A mutual fund that seeks both, capital appreciation and income by investing in stocks, bonds, and cash.

### **Life-cycle fund**

A mutual fund that is designed for investors of a certain age or with a specific time horizon for investing. They offer different risk profiles that investors can shift between as their circumstance changes.

### **Target Date fund**

A diverse mix of investments like stocks, bonds, cash equivalents that periodically and automatically adjust over time to grow more conservative as you near age 65.

### **Foreign fund**

A mutual fund that invests in companies located outside of the United States.

### **World fund**

A mutual fund that invests in companies located throughout the world, including the United States.

## **Guarantee of Principal and Interest Products**

A guarantee of principal and interest product guarantees a rate of return for a specified period of time, usually one quarter (three months). Fees are associated with these products and are included in the returns listed on pages 3-6. Every company offers a guarantee of principal and interest account. Effective February 28, 2013, T. Rowe Price no longer offers the Stable Value fund as one of the options in our plan. The Stable Value fund was replaced by a VALIC fixed interest option, but may not necessarily have the same terms and rates as the current VALIC fixed interest option listed on page 5 of this document. When the term "guaranteed" is used to describe any product in the Plan, it refers to a guarantee made by one of the Investment Companies in the Plan, not the Deferred Compensation Program or the State of Florida.

## **Historical Returns**

The returns reflect historical performance and should not be considered indicative of future performance. Returns include changes in principal value, reinvested dividends, and capital gain distributions. Investment return and principal value will vary and shares may be worth more or less at redemption than at original price. Read the fund's prospectus carefully for more information on management fees, risk, and other expenses before you enroll in a fund.

## **Fee**

The fee of the mutual fund offered through the Investment Provider (expense for managing the fund). This fee (expense ratio) is subject to change at any time, within certain limits. The Investment Company is responsible for reporting the most recent expense ratios to the Bureau of Deferred Compensation.

A "Redemption Fee" is a fee charged for selling a mutual fund too quickly after buying. A redemption fee is used to discourage the buying and selling of mutual funds frequently. It is only charged to the investor when a fund is sold within the window of time designated by the mutual fund company. Not all funds will have this fee, but it is important to review each fund's prospectus or call the investment company for more information about fund redemption fees.
